DETAILED ACTION

Introduction

1. This office action is in response to applicant's request for continued examination filed 11/11/09. Claims 1-16, and 18-21 are currently pending and have been examined.

Response to Arguments

2. Applicant's arguments, see remarks, filed 11/11/09, with respect to Claim Rejections - 35 U.S.C. §103(a) have been fully considered and are persuasive. The claim rejections under 35 U.S.C. §103(a) of claims 1-16, and 18-21 have been withdrawn.

Allowable Subject Matter

3. Claims 1-16 and 18-21 are allowed.
4. The following is an examiner's statement of reasons for allowance:

The instant application is deemed to be directed to a non-obvious improvement over the invention patented in:

Babst (US 7,194,404) who teaches utilizing word chunks to enhance word prediction in response to receiving an input character including a jump bar comprising a plurality of buttons and a code set.

Robertson (US 2006/0277213) who teaches functionality for users to search the contacts of contacts of the respective user.

Cotte (US 2004/0148351) who teaches multiple language character sets for encoding communications.

However, neither Babst, Robertson or Cotte alone or in obvious combination teach:

Regarding claims 1 and 10 **"wherein each of the plurality of character codes represents an alphanumeric character associated with a different language, ...wherein each button of the plurality of buttons of the jump bar is associated with two alphanumeric characters of a first language and simultaneously associated with two alphanumeric characters of at least a second language, wherein the first language is different from the second language, wherein each of the plurality of character codes represents an alphanumeric character associated with a different language,** and wherein the plurality of character codes are arranged as respectively contiguous ranges of numbers to enable the identification of a language to which an alphanumeric character belongs upon the identification of one of the plurality of character codes representing the alphanumeric character.

Regarding claim 16, “**wherein each of the plurality of character codes represents an alphanumeric character associated with a different language,...** displaying the alphanumeric characters corresponding to the identified character codes on respective buttons of the jump bar, wherein the jump bar comprises a button data table including a plurality of rows comprising at least the plurality of character codes for the plurality of alphanumeric characters, the plurality of rows equal to a maximum number of the buttons displayable in the jump bar, wherein **each** of the **buttons** of the jump bar is associated with **two alphanumeric characters** of a **first language** and **simultaneously** associated with **two alphanumeric characters** of at least a **second language**, wherein the first language is different from the second language.”

Claims 2-9, 11-15, and 18-21 are allowed as they depend from their respective allowed independent parent claim.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- Zerber (US 6,292,770) teaches and address directory including character list coded in Unicode.
